

November 19, 2007

Dear Project Committee,

I am pleased to announce that the new NCS Steering Committee has been formed. The current terms of the members to the Version 4 NCS Steering Committee ended on November 2007. The members of the Version 5 NCS Steering Committee are:

- Rick Green, RA. CSI, CCS, Wilson and Company, **Vice Chair**
- Greg Jordan, Dewberry, **Secretary**
- Kevin Busacker, Leo A. Daly Company
- Ed Lowe, Burgess & Niple, Inc.
- Volker Mueller, NBBJ
- Stephen Spangler, USACE
- Jason Tirone, Dekker/Perich/Sabatini
-

I am very excited about the new group and getting that process going, and very appreciative of these folks agreeing to volunteer their time, efforts and expertise to continue to move the NCS forward and keep it a valuable tool for you and your companies.

As incoming Chair I also want to take this opportunity to thank the outgoing Steering Committee and the outgoing Chair David Jordani for their contributions to the version 4.0 update. I know the hours that these people have contributed; they left us in great shape to continue the efforts.

The kick off meeting of the V5 NCS Steering Committee will take place in Washington DC at NIBS offices on December 14, 2007 from 9:00 a.m. - 12:00 noon. Meetings details and an agenda will soon follow.

I look forward to your active participation in our next round of revisions.

Mark Butler

Chair, US National CAD Standard Project Committee
